Table 1. Mean signature quality ρ (Eq. 1) for six transformations T, equally averaged over three models and two workloads. Columns are ordered by increasing mean.

Transform	Binary	Gate logit	Gate prob	$\sqrt{\text{count}}$	Count	Count·idf
Mean ρ	0.470	0.622	0.673	0.708	0.749	**0.764**
